Education

The University of Texas at Austin **Austin, TX**
Ph.D. Computer Science *2021–Present*
Advisor: Dr. Simon Peter
Areas: Systems & Networking

The University of Texas at Austin **Austin, TX**
M.S. Computer Science, GPA: 4.0/4.0 *2019–2021*
Courses: Operating Systems, Datacenters, Virtualization, Distributed Systems
Thesis: Flexible TCP offload to programmable SmartNICs with Fine-Grained Parallelism
Teaching Experience: Cloud Computing (Spring 20)

Birla Institute of Technology and Science **Pilani, India**
M.Sc. Physics, GPA: 9.01/10 Distinction Class *2012–2017*
Awarded **Best Student of Batch 2017**
Thesis: Driven Aubry-André-Harper systems
Advisor: Dr. Tapomoy Guha Sarkar

Birla Institute of Technology and Science **Pilani, India**
B.E. Computer Science, GPA: 9.01/10 Distinction Class *2012–2017*
Courses: Parallel Computing, Information Retrieval, Data Mining
Advisor: Prof. Sundar Balasubramaniam

Research Experience

The University of Texas at Austin **Austin, TX**
Graduate Research Assistant *2019–Present*
Advisor: Dr. Simon Peter

Flexible TCP offload to programmable SmartNICs with Fine-grained Parallelism (* *under submission* *)
- Full offload of TCP packet processing to SmartNIC – free CPU cores from TCP overhead.
- Data transfer directly from application memory to wire, eliminating OS and context switch overheads.
- POSIX-compliant: Unlike RDMA, no modifications required to application and network configuration.
- Memcached scales up to 38% better versus TAS, while saving 81% host CPU cycles versus Chelsio ToE.
- Provides competitive performance for RPCs, even with wimpy SmartNICs.
- Interoperates well with other TCP stacks and is easily extensible using XDP-eBPF.

Distributed file systems with Client-Local NVMs
- Scaling client-local NVM filesystems like Assise beyond rack-scale.
- In-network caching, coordination and coherence mechanisms.

Distributed key-value store with co-located Serverless compute
- Aggregate compute and storage to exploit data locality.
- Improves execution time of serverless compilation workloads by 1.6x and 5x reduction in data movement compared to conventional disaggregated deployments.

SRoCE: Software RDMA over Commodity Ethernet
- Software-based flexible RDMA verbs implementation using high performance user-space TCP stack.
- Achieved 3x single-connection throughput for one-sided 1000 bytes RDMA ops as compared to H/W RDMA NICs.

Improving connection scalability of TAS: datacenter TCP stack
- Increased throughput by 10% at 100k connections by improving TCP shaping and congestion control module.

Samsung Research **Bangalore, India & Suwon, South Korea**
Senior Software Engineer (Research) *2017–2019*
Advisors: Anshuman Nigam & Dr. Dojun Byun
5G Radio Access Network data-plane R&D
- Involved in the development of world's first pre-5G mobile user equipment.
- Data-plane technical support for the 5G demo at *Winter Olympics (South Korea, 2018)*.
- *Parallelization, memory management and flow control* research: improved throughput, ultra-low latency reliable transport, and reduced memory footprint on 5G Distributed Units.
- *Samsung Technical Excellence* and *Outstanding Project* awards for quality and impact.

Reinforcement Learning based radio-resource schedulers
- Modeled scheduling as a Partially Observable Markov Decision Process to solve multi-objective optimization in stochastic input-driven environments. (GLOBECOM'20)

Birla Institute of Technology and Science **Pilani, India**
Research Student *2015–2016*
Advisor: Dr. Tapomoy Guha Sarkar
Studying Quantum Chaos in Aubry-André-Harper electron systems
- Studied phase transitions in Hofstadter's butterfly under time-varying magnetic field and the relationship between topological invariants and Hall conductivity. (PhysRevA'16)
- Simulated and computationally evaluated solutions to Schrodinger's equation for special quantum systems using perturbation methods and computational physics algorithms.

National Central University **Zhongli, Taiwan**
Undergraduate Research Assistant *Summer 2015*
Advisor: Ko Chung-Ming
Gravitational lensing in elliptical galaxies
- Analytically derived the gravitational lensing equation for elliptical galaxies.
- Developed a *distributed recursive sub-gridding* algorithm to find the solution on a cluster and simulate the lensing.

Bhaskaracharya Institute of Space Applications and Geoinformatics **Gandhinagar, India**
Undergraduate Research Assistant *Summer 2014*
Satellite image geo-registration and stitching
- Developed plugins to automatically geo-register satellite images for QGIS – open-source geo-information system.
- Satellite image stitching using SIFT, SURF algorithms in OpenCV.

Industry Experience

Confluent **Mountain View, CA**
Software Engineering Intern *Summer 2020*
Kubernetes control plane for deployment life-cycle management of Kafka clusters.
Designed *safe and seamless live migration* of Kafka deployments with no service disruption.

Symantec **Bangalore, India**
Software Engineering Intern *Spring 2017*
Designed a proof-of-concept cloud-ready web application to automate purchase, delivery & installation of SSL certificates for services hosted on Amazon AWS.

Microsoft R&D **Hyderabad, India**
Software Engineering Intern *Summer 2016*
Integrated Azure AD cloud authentication/authorization service into ASP.NET Core.

Google Summer of Code **Apache Software Foundation**
Open-source Intern *Summer 2013*
Document version-control toolbar integrated with cloud repositories in Apache OpenOffice.

Projects

IoT enabled Laboratory Environment: Project SmartLAB **BITS, Pilani**
Undergraduate Researcher *2012-2013*
Proactive lab monitoring and activity tracking using sensor networks, speech and gesture recognition
- Awarded *Prof. I J Nagrath Student Project Fund* by Dept. of Electrical Engineering, BITS Pilani.
- Won 2nd place in *Siemens Home Automation challenge*.
- Blog: https://smartlabbits.wordpress.com

Awards

Best Student of Batch 2017: adjudged by Dept. of Physics, BITS Pilani

BITS Pilani MCN Scholarship: 80% tuition fee waiver for all semesters (top 5% in a batch of 800 students)

Prof. I J Nagrath Student Project Fund: awarded by BITSAA & Dept. of EE, BITS Pilani

Samsung Annual Excellence Awards: organization-wide award for technical excellence

Samsung Professional Software Competency: held by $< 10\%$ employees globally when obtained
